

TORCHED DISPLAYS

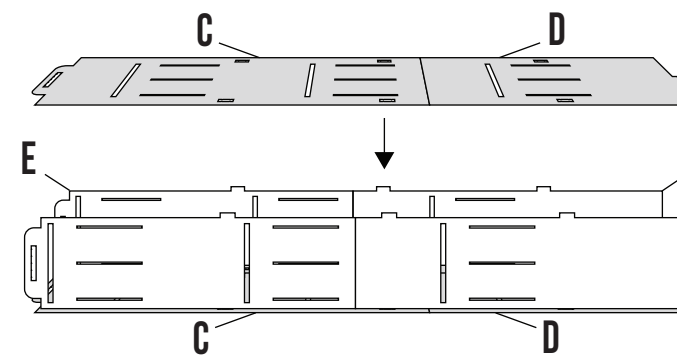

ATTENTION: these fittings are designed to engage each other with minimal effort. You will never need any other tools to build your display. **DO NOT** force pieces. If a piece is broken, please contact us for replacement.

PART LIST

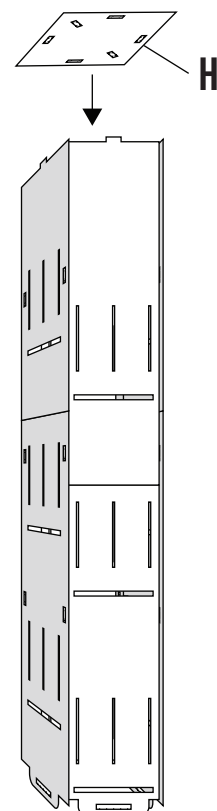

<div>A</div> <div></div> <div>①</div>	<div>B</div> <div></div> <div>①</div>	
<div>C</div> <div></div> <div>②</div>	<div>D</div> <div></div> <div>②</div>	
<div>E</div> <div></div> <div>②</div>	<div>F</div> <div></div> <div>②</div>	
<div>G</div> <div></div> <div>⑥</div>	<div>H</div> <div></div> <div>①</div>	
<div>I</div> <div></div> <div>⑫</div>	<div>K</div> <div></div> <div>⑫</div>	<div>L</div> <div></div> <div>④</div>
<div>J</div> <div></div> <div>⑥</div>		

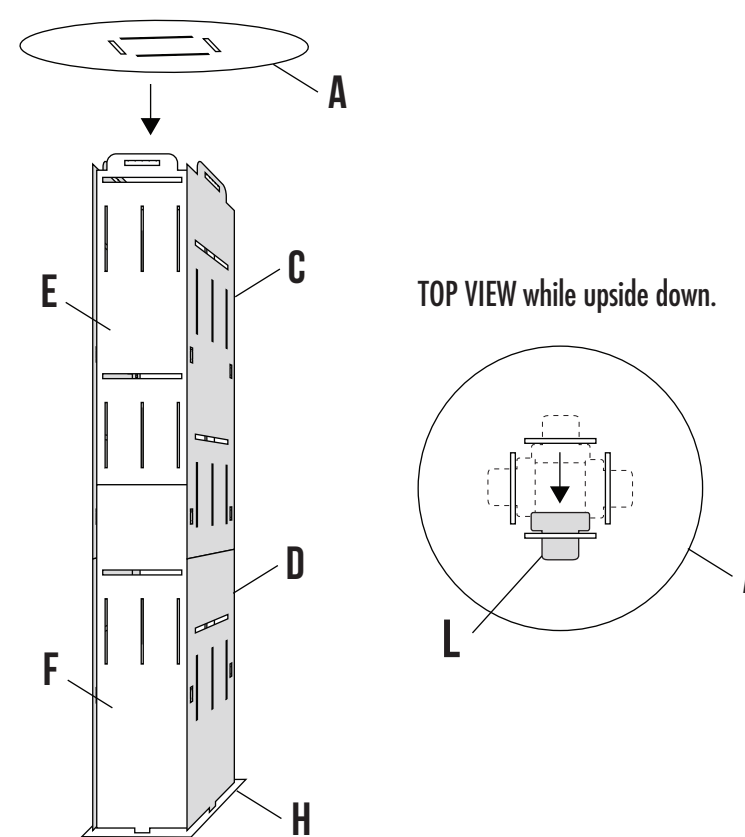

STEP 1: Lay boards **C** and **D** flat. Attach both boards **E** and **F** to board **C** and **D** to both sides.

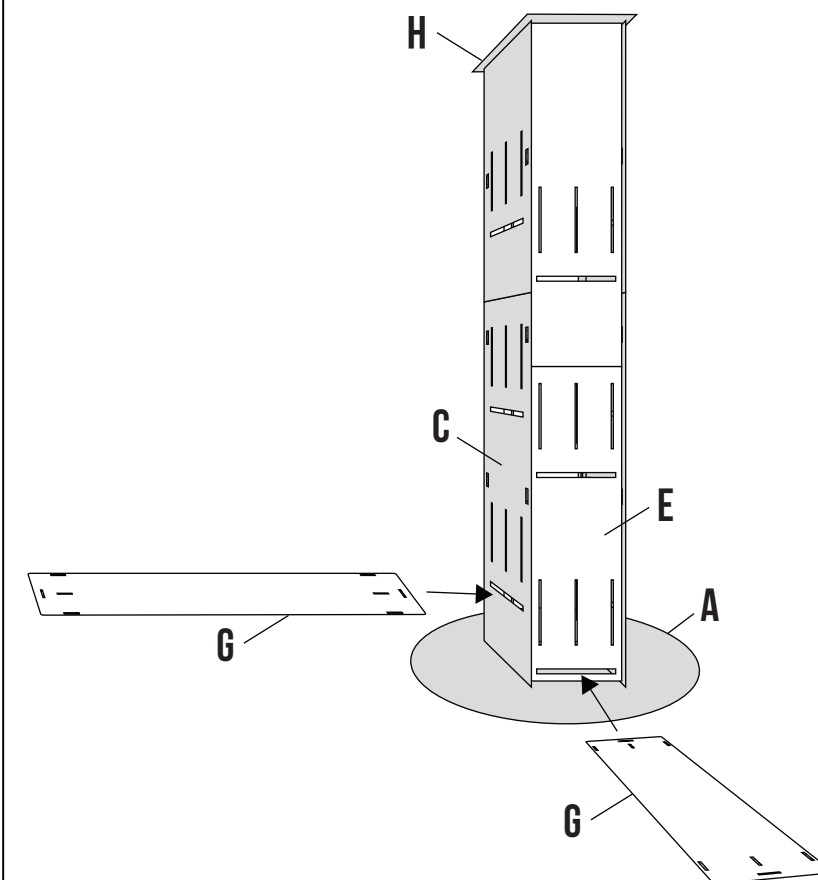

STEP 2: Connect the second board **C** and **D** to the open side of **E** and **F**.

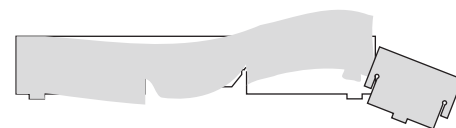

STEP 3: Connect board **H** to top of boards **D** and **F**.

STEP 4: Turn tower upside down and connect rotating board **A** to boards **E** and **C**. Insert board pegs **L** to secure rotating board **A** to boards **E** and **C** (only 2 are needed).

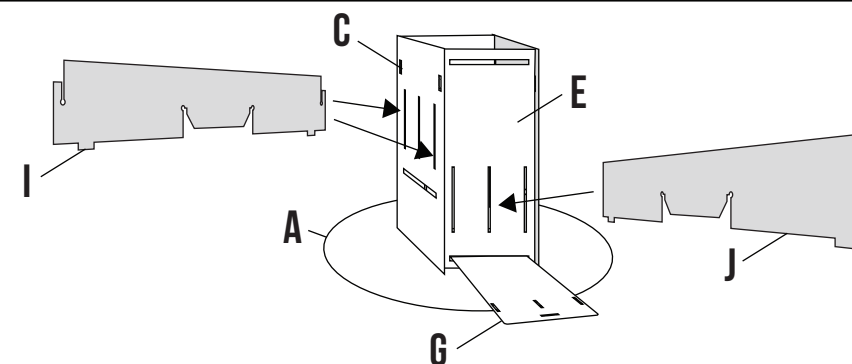

STEP 5: Turn tower right side up and insert board **G** through slits in board **E** starting from the bottom. After **STEP 8** insert next board **G** into **C** starting from the bottom.

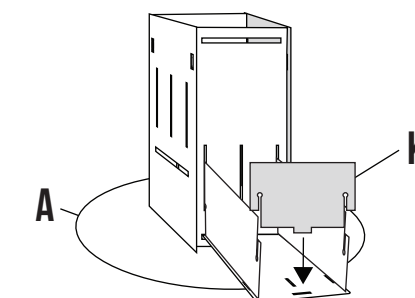

STEP 6: Remove film from both sides of the acrylic boards **I**, **J** and **K**.

TIP: Rubbing 2 films against each other will help lift the film.

STEP 7: Insert acrylic boards **I** into the 2 outside vertical slits on board **C**. Optional: Insert acrylic board **J** into middle slits of shelves.

STEP 8: Connect acrylic boards **K** into the 2 ends of boards **I**. Continue building each shelf from bottom up onto boards **C**, **E**, **D** and **F**.
